EDUCATION

Carleton University, Ottawa

Sep 2021 - Dec 2025

Bachelor's degree of Computer Science

- GPA: 3.8/4.0; received the Entrance International Award of Excellence and on Dean's list since 2021.

EXPERIENCE

National Australia Bank — Software Engineer

Apr 2026 - Present

- Built event-driven Apache Kafka consumers and distributed schedulers in Java/Spring Boot, using ShedLock and PostgreSQL row-level locking to ensure idempotent, single-execution processing across horizontally scaled instances.
- Built fail-closed, deny-by-default authorization, supporting PCI DSS compliance and secure cardholder-data handling.
- Delivered Flyway schema migrations, JPA data-access layers, and REST APIs using safe, zero-downtime change patterns.
- Shipped work through a CI/CD pipeline with automated build/test gates, JUnit coverage, and peer review, ramping quickly from foundational tasks to owning end-to-end feature slices within a quarter.

Searidge Technologies — Platform Developer Intern (DevOps)

Jan 2025 - Aug 2025

- Automated Kubernetes application deployments using Helm and GitLab CI/CD across multiple environments.
- Configured and troubleshoot Strimzi Kafka with Keycloak OAuth2 authentication for secure event streaming.
- Integrated Harbor registry with Rancher-managed RKE2 clusters for secure container image distribution.
- Diagnosed and resolved networking, storage, ingress, and TLS issues across Kubernetes workloads.
- Customized ingress routing and platform configuration using NGINX annotations and Helm overrides.
- Centralized platform operations through Rancher UI customization to improve internal developer workflows.
- Collaborated in Agile sprints with cross-functional teams to deliver infrastructure features and fixes.

KMS Healthcare — Software Engineer Intern

Jun 2024 - Sep 2024

- Fine-tuned a Seq2Seq NLP model on a 7,000-record medical dataset, improving prediction accuracy to 80%.
- Integrated FastAPI services with Qdrant vector database for semantic disease profile retrieval.
- Built automated deployment workflows using Miniconda, Docker, and Poetry.
- Analyzed and visualized datasets using Pandas and Matplotlib to support model evaluation.
- Developed frontend components using TypeScript, Bootstrap, and JSX.
- Contributed to GenAI research and system architecture discussions aligned with medical guidelines.

Intega IT — L1 Desktop Support Specialist

Sep 2023 - Dec 2023

- Resolved over 1,400 application, printer, and network support tickets within four months, reducing resolution time by 30%.
- Supported end users using Autotask and Field Effect platforms while maintaining a 95% positive feedback rating.

PROJECTS

OpenAI Review & Guide Agent

🐙 Python, Llama, Qdrant, FastAPI, Docker, Streamlit

- Developed an AI-powered question-answering system using LLMs and vector-based semantic retrieval.
- Implemented FastAPI backend services for query processing and response generation.
- Utilized Qdrant vector database for efficient storage and retrieval of embedded datasets.
- Containerized the application using Docker to support portable deployment workflows.

Hack the Flush

🐙 React, Flask, FastAPI, Firebase, Solace PubSub+ Cloud

- Built a real-time monitoring system for bathroom occupancy using event-driven IoT data streaming.
- Developed backend APIs using Flask and FastAPI to process and distribute live occupancy data.
- Integrated Firebase synchronization and Solace PubSub+ Cloud messaging for real-time updates.
- Designed a responsive React frontend for live visualization and user interaction.

TECHNICAL SKILLS

- **Programming:** Python, C/C++, Java, JavaScript, TypeScript
- **Backend & Frameworks:** Spring Boot, RESTS APIs, FastAPI, Node.js, React, Bootstrap, HTML, CSS
- **Infrastructure & DevOps:** Docker, Kubernetes (RKE2), Helm, Rancher, GitLab CI/CD, Harness
- **Monitoring & Security:** Grafana, Prometheus, Keycloak, OAuth2, SSO, Solace PubSub+ Cloud
- **Databases:** PostgreSQL, MongoDB, Qdrant, Firebase
- **Tools & Environments:** Git, GitHub, GitLab, Linux, Miniconda, Poetry, Streamlit, QT Creator
- **Operating Systems:** Ubuntu Linux, Windows, macOS
